

# **1000w solar inverter for sale in Czech-Republic**

## Overview

---

How is the solar industry growing in Czech Republic?

In Czech Republic, in particular, the solar industry is experiencing a massive growth period. There are more households and businesses that have installed solar roof panels. Czech Republic held a 19% share in renewable energy for electricity generation. They are expected to increase the share to 22% by 2030.

What is a solar inverter?

The solar inverter or inverter converts direct current into alternating current, thanks to which the energy from the photovoltaic system can only be used. We offer classic or hybrid (mains and battery) inverters with different performance and characteristics.

What is a microinverter solar system?

Typically, microinverters are “distributed” inverters. Solar PV systems with microinverters have a small inverter installed for each individual solar panel. Instead of sending energy from every panel to a single inverter, microinverters convert the DC energy to AC energy on the roof itself.

Which inverter is best for a solar system?

String inverters are the most economical among other options and are a proven inverter technology. These inverters are also the easiest to maintain as they are easy to access. If a solar system uses a string inverter, it will produce limited electricity.

## 1000w solar inverter for sale in Czech-Republic
