

# **16 cells to make a solar container lithium battery pack**

## Overview

---

### How to build a lithium ion battery pack?

Here is a step by step on how to build a lithium ion battery pack. Initial Preparation. Check battery specifications and requirements. Prepare materials and tools. Checking and assembling battery cells. Check battery cell voltage. Arrange the cells according to the configuration. Isolate battery cells.

### How to choose a lithium ion battery pack?

Select the appropriate battery cells, such as 21700, 18650, or pouch cells, depending on the power you need and the space you require. To avoid imbalance in the Lithium Ion battery pack, make sure that all cells have the same capacity and voltage. Adhesive Tape or plastic sheath is used to protect the battery pack.

### How to build a battery pack?

To successfully build a battery pack, gather the following materials and tools:  
18650 Lithium-Ion Cells: Choose high-quality cells suitable for your application.  
Battery Holder: A holder or spacers to secure the cells in place.  
Nickel Strips: For connecting cells together.

### What is a lithium ion battery pack?

The content covers cell format selection, series and parallel configuration design, battery management system implementation, and safety compliance requirements. All essential components of a lithium ion battery pack are addressed to support engineers developing both simple portable devices and complex motive applications.
