

60kWh Energy Storage Container for Marine Use

Overview

What is containerized energy storage?

ABB's containerized energy storage solution is a complete, self-contained battery solution for a large-scale marine energy storage. The batteries and all control, interface, and auxiliary equipment are delivered in a single shipping container for simple installation on board any vessel. How does containerized energy storage work?

.

How does a maritime energy storage system work?

The maritime energy storage system stores energy when demand is low, and delivers it back when demand increases, enhancing the performance of the vessel's power plant. The flow of energy is controlled by ABB's dynamic Energy Storage Control System.

What makes ABB a unique marine energy storage system?

For systems, ABB takes the uncertainty out of marine energy storage. ABB's holistic approach includes complete mechanical, electrical and control design, resulting in a simple, standardized package. The complete system is fully tested before delivery, allowing for

Which ships use Corvus Energy Storage Systems?

Corvus has the largest installed base of marine energy storage systems in operation worldwide. Many of the world's first electric powered vessels use a Corvus energy storage system, including the first all-electric fast ferry, tanker, workboat, harbour tugboat, commercial fishing vessel, and more.

60kWh Energy Storage Container for Marine Use
