

# A battery that can store 3 kWh of electricity

## Overview

---

What is a 3 kWh battery?

A 3 kWh battery is a rechargeable battery capable of storing (and thus providing) up to 3 kilowatt-hours (kWh) of electrical energy. You can find 3 kWh batteries of different chemistries. They vary in efficiency, performance, weight, cost, size (dimensions), and durability. Currently, LiFePO<sub>4</sub> is the best battery technology for house batteries.

How much energy does a pwrcell DCB battery have?

The Generac PWRcell DCB battery module offers 3.6 kWh of name plate energy and 3 kWh of usable energy, for battery backup storage and smart energy management. The lithium-ion PWRcell battery series allows system owners the flexibility to scale from.

How long do 3 kWh batteries last?

You can find 3 kWh batteries of different chemistries. They vary in efficiency, performance, weight, cost, size (dimensions), and durability. Currently, LiFePO<sub>4</sub> is the best battery technology for house batteries. It's maintenance-free, lightweight, and can last many years (approximately 5000 cycles or 10 to 15 years).

What does 3 kWh mean?

Kilowatt-hours (kWh) are a unit of energy. Therefore, 3 kWh refers to how much energy a battery can store. However, it doesn't give you any information on the battery's voltage, which is an important detail when setting up your solar energy plus storage system. Energy capacity (Wh) is a product of charge capacity (Ah), and voltage (V):
