

# BESS Compressed Air Energy Storage Project

## Overview

---

What is a compressed air energy storage project?

A compressed air energy storage (CAES) project in Hubei, China, has come online, with 300MW/1,500MWh of capacity. The 5-hour duration project, called Hubei Yingchang, was built in two years with a total investment of CNY1.95 billion (US\$270 million) and uses abandoned salt mines in the Yingcheng area of Hubei, China's sixth-most populous province.

What is compressed air energy storage (CAES)?

Compressed air energy storage (CAES) is an effective solution for balancing this mismatch and therefore is suitable for use in future electrical systems to achieve a high penetration of renewable energy generation.

Can compressed air energy storage improve the profitability of existing power plants?

Linden Svd, Patel M. New compressed air energy storage concept improves the profitability of existing simple cycle, combined cycle, wind energy, and landfill gas power plants. In: Proceedings of ASME Turbo Expo 2004: Power for Land, Sea, and Air; 2004 Jun 14-17; Vienna, Austria. ASME; 2004. p. 103-10. F. He, Y. Xu, X. Zhang, C. Liu, H. Chen.

What is the exergy pressure of a 2-MW uwcaes system?

An advanced exergy analysis was conducted on a 2-MW UWCAES system. The system includes a three-stage CMP and a three-stage expander with interstage HXs . The storage pressure for unavoidable and real conditions is 2.08 and 2.61 MPa, respectively.
