

Beirut installs solar panels

Overview

Are solar panels exploding in Beirut?

According to the state-run National News Agency, solar energy systems exploded in homes in several areas of Beirut and the south on Wednesday, but the reports remain unconfirmed. What's behind Lebanon's solar boom?

The solar boom is a byproduct of Lebanon's crisis. Private installations in businesses and homes since 2020 will have added 350MW of renewable power — about 5-7 per cent of Lebanon's annual energy needs — by year-end, said Pierre El Khoury, head of the state-affiliated Lebanese Center for Energy Conservation.

Are solar energy systems exploding in Lebanon?

(Credit: João Sousa/L'Orient Today) BEIRUT — On Wednesday, amid the second wave of Hezbollah communication devices detonating, reports emerged of solar energy systems also exploding in several areas of Lebanon, sparking further concern among residents for their safety.

Did Hezbollah's solar panels explode in Beirut?

Lebanon's National News Agency (NNA) has reported that Hezbollah's solar panels and walkie-talkies exploded on Wednesday, following a wave of pager explosions the day before.
