

# Can energy storage batteries be placed indoors

## Overview

---

Can a solar battery be installed outside?

Solar batteries can be installed either indoors or outdoors as long as they comply with AS/NZS 5139:2019, the installation requirements for Battery Energy Storage Systems (BESS). The ideal location to install a solar battery for residential properties is inside the garage.

Do solar batteries need to be stored indoors?

**Temperature Control:** Storing solar batteries indoors allows for better temperature control, minimizing the risk of extreme heat or cold. Consistent temperatures within the manufacturer's recommended range help maintain battery efficiency and prolong their lifespan. **Security:** Indoor storage provides added security against theft or vandalism.

Why should you install solar batteries indoors?

Indoor installation of solar batteries offers several key benefits. These advantages enhance battery performance, safety, and longevity while addressing common concerns homeowners may have. Indoor installations maximize space efficiency. You can choose compact battery models that fit into small areas, such as garages or basements.

Do battery energy storage systems need to be installed?

As per the Clean Energy Council regulations, all Battery Energy Storage systems need to be installed to comply with the current versions of AS/NZS 5139:2019. In addition, all CEC-accredited persons need to comply with the current versions of the following standards: Grid connection of energy systems via inverters. Part 1: Installation requirements
