

Chad base station communication progress is slow

Overview

Is Chad lagging behind in the development of telecommunications?

Compared to the United States, Chad is massively lagging behind in the development of telecommunications. Under the country code +235, there were a total of 12.09 million connections in 2022. Among them were 12.09 million mobile phones, which corresponds to an average of 0.68 per person. In the US, this figure is 1.1 mobile phones per person.

How many people in Chad have broadband?

Values above 100 percent mean that, on average, every inhabitant has more than one connection. Chad is lagging behind in the expansion of broadband internet connections. Around 18 percent of all residents have access to the internet.

Does Chad have a good internet connection?

Chad is lagging behind in the expansion of broadband internet connections. Around 18 percent of all residents have access to the internet. Around 0 percent have their own fast internet connection, which is at least faster than the former ISDN (more than 256 kbit/s).

Are cell phones a problem in Chad?

All fixed connections via DSL, cable or satellite were counted here, but not those connected to the internet via mobile communications. The increasing prevalence of cell phones and the simultaneous decline in landline phones clearly indicate a change in Chad.
