

Copenhagen roof tiles solar

Overview

What is the first solar facade in Copenhagen?

THE FIRST SOLAR FACADE AT A LISTED BUILDING IN COPENHAGEN. A beautiful facade solution with red high-efficiency CFR solar cells in one of Copenhagen's many red stone properties. The first first red solar cell facade solution in Copenhagen, and probably the first in the world.

What is Danish solar energy?

Danish solar energy releases the world's most efficient selection of colored solar modules. This ingenious technology is especially interesting for the building industry, where solar energy can be integrated 100% in the building so that roofs and facades in practice become energy producing.

What is a Tesla roof?

Interest in the Tesla roof was high from the start, and with its aesthetic expression, it created a market for solar cells among private homeowners who did not like traditional solar panel systems. Read the history about Solartag [HERE](#).

Is solartag a good roof material?

Our roof has been tested by independent entities, most recently with Wind and Load Testing, making Solartag a viable option, for example, in the Faroe Islands. Solartag is an approved building material, which has obtained an Environmental Product Declaration (EPD).
