

Costa Rica power station generator

Overview

How many hydro power plants are in Costa Rica?

Costa Rica generates hydro-powered energy from 18 hydro power plants across the country. In total, these hydro power plants has a capacity of 1298.0 MW. What is hydropower?

Hydropower, also known as hydroelectric power, is a form of renewable energy that generates electricity by harnessing the power of moving water.

How is electricity used in Costa Rica?

Electricity can be generated in two main ways: by harnessing the heat from burning fuels or nuclear reactions in the form of steam (thermal power) or by capturing the energy of natural forces such as the sun, wind or moving water.

What is Costa Rica's energy policy?

Costa Rica's energy policy aims to move from a fossil fuels based energy system towards renewable energy sources and to expand its power generation capacity, replacing old power generating stations and developing new projects.

How can Costa Rica improve its energy resilience & environmental stewardship?

By sustaining and building on these trends, particularly through diversified sources like solar and possibly nuclear, Costa Rica can enhance its energy resilience and environmental stewardship. Costa Rica's electricity mix includes 76% Hydropower, 11% Wind and 11% Geothermal. Low-carbon generation reached a record high in 2025.
