

Cylindrical 10ah lithium iron phosphate battery

Overview

What is a 12V 100Ah lithium iron phosphate battery used for?

This 12V 100Ah Lithium Iron Phosphate battery can also be used to replace standard lead-acid batteries in the use of mobility scooters, UPS system, fire alarm systems, access control systems and medical devices. They are growing in popularity for military and aerospace applications. The Canbat CLI100-12 is a UL certified 12V 100Ah LiFePO4 battery.

What is a 12V Lithium iron phosphate battery?

A 12V lithium iron phosphate battery is a type of rechargeable battery that comes with a Battery Management System (BMS). The BMS in this battery protects against short circuits, overcharge, and deep discharge. It also balances cells to increase battery life, improve performance, and protect against mishandling.

What is a cylindrical lithium ion battery?

Cylindrical cells one of the most widely used lithium ion battery shapes due to ease to use and good mechanical stability. The tubular cylindrical shape can withstand high internal pressures without collapsing. Melasta produces multiple sizes and capacities according to the customer requirement.

What is a headway 38120s 3.2V 10AH LiFePO4 battery?

Headway 38120S 3.2V 10Ah LiFePO4 lithium iron phosphate cylindrical battery cells with screws and high charge discharge rate. Individual pricing for large scale projects and wholesale demands is available. Parameters of 38120S :
Max. Charge current: 20A (2C) Max. Continuous Discharge Current: 30A (3C)
Max. Pulse Discharge Current: 100A (10C)
