

Developers solar Systems

Overview

Who are the world's top solar developers?

Image: TotalEnergies The top ten utility-scale solar developers from across the globe accounted for 145GW of operational, under construction and contracted projects between July 2022 and June 2023, with French energy giant TotalEnergies being the top solar developer, according to research firm Mercom Capital Group's latest report.

Who is a solar developer?

Solar developers are mostly responsible for large scale, rather than residential, solar panel projects. Why trust EnergySage?

In 2021, the U.S. installed more solar than ever before - with one out of every 600 U.S. homeowners installing solar each quarter! And impressively, more than half of those additions came from utility-scale projects.

What is the difference between a solar developer and a residential solar system?

The average residential solar panel system is about 10 kilowatts (kW); in comparison, solar developers often work on projects that are multiple megawatts (MW, 1 MW = 1,000 kW) and involve hundreds or thousands of solar panels. Generally, solar developer projects can be broken down into three separate categories:.

How do solar developers work?

Solar developers work directly with landowners to find the perfect spot for a solar project. And there's a lot of consideration that goes into this step - you can't plop thousands of solar panels anywhere.
