

# Dili Energy Storage BESS Price

## Overview

---

What is a battery energy storage system (BESS)?

Summary04 Introduction22 Research ContactsEXECUTIVE SUMMARYA Battery Energy Storage System (BESS) secures electrical energy from renewable and non-renewable sources and collects and saves it in rechargeable batteries for use at a later date. When energy is needed, it is released from the BESS to power demand to lessen any.

How much does a battery energy storage system cost in China?

The procurement exercise has attracted 67 battery energy storage companies but only six have emerged as winners. The average bid stood at CNY 0.473/Wh (\$65/kWh). Public procurements in China continue to demonstrate exceptionally low price levels for lithium-ion phosphate (LFP) battery energy storage systems (BESS).

Is a Bess project 'stable' in China?

A BESS project in China deployed by Hyperstrong, the largest system integrator in the domestic market. Image: Hyperstrong. China has reached well over 70GW of installed BESS capacity, while DC block prices appear to be 'stable', a local metals price agency said.

How much energy storage does Bess have?

Including all energy storage, its total installed capacity is now 137GW, meaning that 'new energy storage', mostly BESS, now exceeds its pumped hydro capacity. That is thanks to 43.7GW/109.8GWh of 'new energy storage' that was installed in 2024, CNESA said.
