

East Asia solar Energy Storage Project

Overview

Which countries are deploying a battery energy storage system (Bess) in 2025?

Spanning Australia, Japan, Southeast Asia and South Asia, these deployments represent a substantial contribution to 16 GWh of new Battery Energy Storage System (BESS) capacity projected to be added in APAC (excluding China) in 2025, according to BloombergNEF.

How many pumped storage facilities are there in China?

For China, this average is from 315 projects, far and away the highest number of pumped storage facilities recorded in the world. In September 2021, China's National Energy Administration (NEA) released its "Mid-term and Long-term Development Plan for Pumped Storage Hydropower 2021-2035." The official goal is to reach.

Which China provinces have the largest pumped storage capacity?

In the central China region, the provinces of Zhejiang, Hubei, and Hunan possess the largest prospective capacities in the pipeline, with 95 GW across 79 projects. Moreover, 13 provinces that do not presently have any operating pumped storage facilities boast over 127 GW of prospective capacity.

Why is Trina storage growing in Asia Pacific?

"Our growing presence across APAC reflects not only strong market demand but growing recognition of Trina Storage's differentiated technology, delivery capabilities, and long-term reliability," said Dr Leo Zhao, Head of Energy Storage at Trinasolar Asia Pacific.
