

East Timor explosion-proof solar panel manufacturer

Overview

Which solar panels are ATEX & IECEx certified?

For companies like JCE, which manufactures the SPA series of ATEX and IECEx-certified solar panels, compliance with both certification systems allows their products to be used across industries worldwide, particularly in challenging environments such as offshore oil & gas installations and chemical processing plants.

Are ATEX solar panels explosion-proof?

Enhanced Safety Features: Standard panels do not need to be explosion-proof, meaning they lack safety features of ATEX and IECEx-certified panels. For instance, while a typical solar panel might house its electrical connections in standard junction boxes, ATEX panels use explosion-proof junction boxes.

Are EPL solar panels IECEx compliant?

EPL (Equipment Protection Level) Gb solar panels are IECEx compliant for Zone 1 applications, where the risk of explosion is frequent due to the presence of flammable gases or vapours. For Zone 2 applications, where the risk is intermittent, EPL Gc solar panels are suitable.
