

Egypt solar container outdoor power installation

Overview

Can solar power fix Egypt's energy crisis?

Egypt's first large-scale hybrid solar and battery plant has begun construction as the country looks to its abundant sunshine to help fix its energy crisis. Obelisk, located in Nagaa Hammadi, will combine 1.1 gigawatts of solar production with 200 megawatt hours of battery storage.

How many MW solar & battery storage will be built in 2026?

The project will be constructed in two phases. The first phase of 561 MW solar + 100 MW/200 MWh battery storage is targeted to reach commercial operational date (COD) in the first half of 2026 and the second phase of 564 MW solar in the second half of 2026.

Could Egypt's summer heat be a solar solution?

Whilst Egypt's summer heat increases its electricity demand, it could also offer a solution. The south of Egypt, where Scatec's new project is breaking ground is "in the magic solar belt," said Elgendy. According to the Global Solar Atlas, Egypt has the fourth-highest solar PV (photovoltaic) potential of any country.

Where does Egypt's electricity come from?

Around three quarters of Egypt's electricity comes from gas. But in recent years, as its domestic gas production fell, it became reliant on imports and rising gas prices plunged Egypt into a series of blackouts.
