

European Energy Site Locations

Overview

Where is European Energy headquartered?

We are headquartered in Søborg, Denmark but aim to have a physical presence in most countries where we develop our projects. See where to find us below: European Energy aims to be a major global force in driving the green transition. We aim to have a physical presence in most countries where we develop our projects. See our global appearance here.

What are the major energy sources in Europe?

Electricity Production: While some countries still rely heavily on fossil fuels, many European nations are leaders in renewable energy, particularly in wind, solar, and hydropower. Nuclear energy is also a significant contributor in some countries like France, Finland, and the UK. 2. Types of Power Plants in Europe.

Where are solar power plants located in Europe?

Solar Power Plants: Solar power is growing rapidly in southern Europe, particularly in Spain, Italy, and Greece, where sunshine is abundant. Key Plants: Moura Solar Park (Portugal): One of the largest solar parks in Europe, located in southern Portugal.

How does the EU support cross-border energy infrastructure projects?

The EU supports diverse and often cross-border energy infrastructure projects that produce, store, and distribute energy efficiently.
