

Free consultation on wind-resistant folding containers

Overview

Why should you choose a folding container?

Contact us! Folding containers can give up to an 80% saving in volume and are available in standard footprints and heights. Lid and closure options are also available.

Why do you need a lid for a foldable container?

Our foldable boxes come with a range of customizable features, offering flexibility for various industries and optimizing your logistics operations. Lids for foldable containers provide essential protection for contents, keeping items safe from dust, moisture, and contaminants during storage and transportation.

How much space does an empty folding container save?

As an empty folding container can save a volume of up to 80 percent compared to an upright container, a maximum of five times as many empty folded containers can be stored on the same floor space than would be possible with rigid containers.
