

# French BESS rooftop solar panels

## Overview

---

How much does a rooftop solar PV project cost in France?

The ninth auction for rooftop solar PV awarded 54 projects with an average price of €98.2/MWh (US\$106.6/MWh), slightly down from the previous tender which had an average price of €99.95/MWh. The average price for rooftop PV tenders in France has slowly declined, tender after tender, after peaking at €104.5/MWh in the fourth tender.

Is France a good country for rooftop solar?

France remains one of the top performing countries when it comes to the development of Rooftop solar policy and practices, but deliverables still need to be achieved. France's photovoltaic (PV) policies are developed within the National Low Carbon Strategy and the Energy Programme Decree.

Will France slash feed-in tariffs for rooftop PV systems?

The French PV sector has reacted vehemently against the proposed provisions with claims they could completely halt the rooftop PV business. From pv magazine France France's Ministry of Ecological Transition has outlined a proposal to slash the feed-in tariffs (FiTs) for all rooftop PV systems with a capacity of up to 500 kW.

Why is solar PV mandatory in France?

Mandatory solar: Solar PV is mandatory for living roofs for commercial and industrial buildings or covered car parks occupying 500 m<sup>2</sup> or more of ground surface. Power to the people: France's current policy framework is supportive of collective self-consumption and energy communities, with flexible regulations supporting prosumers.
