

Generators for refrigerated containers

Overview

Which generator sets are best for refrigerated container units?

The most rugged, dependable and easy-to-operate generator sets for refrigerated container units. Carrier's industry-leading PowerLINE Generator Sets are designed and built for continuous, unattended operation for all refrigerated containers transported by road or rail worldwide.

What are gensets for reefer containers?

Getting a grip on gensets for reefer containers can seem like a daunting task. But don't fret, we're here to guide you through the ins and outs of this essential equipment. Gensets, short for generator sets, are vital pieces of machinery that power refrigerated containers or 'reefers.

What type of generator is used for refrigerated shipping containers?

- Diesel generators: Diesel generators are the most common type of generator used for refrigerated shipping containers. They are reliable, durable, and can provide a lot of power. However, diesel generators can be noisy and expensive to operate.

How to choose a generator for a refrigerated shipping container?

Diesel, gasoline, and natural gas are good options. Generators can be really loud, so picking one with a low noise level is key. This is even more important if the generator is going to be used in your neighborhood. If you need to move your refrigerated shipping container around, it's best to go for a generator that comes with wheels.
