

# Get cost estimate for solar container price per kWh

## Overview

---

How much does solar cost per kWh?

Q1: What's a good solar cost per kWh?

A: Generally below your local utility rate. National averages range from \$0.08-\$0.20/kWh. Q2: Should I include incentives in total cost?

.

What is a solar energy cost calculator?

Definition: This calculator determines the cost per kilowatt-hour (kWh) of solar energy produced by dividing the total system cost by the total energy output. Purpose: It helps homeowners and businesses evaluate the economic efficiency of their solar power systems. 2. How Does the Calculator Work?

The calculator uses the formula: Where:.

How much does a kWh cost?

A: Generally below your local utility rate. National averages range from \$0.08-\$0.20/kWh. Q2: Should I include incentives in total cost?

A: For true cost, use net price after rebates and tax credits.

What is NREL's solar-plus-storage cost benchmarking work?

This work has grown to include cost models for solar-plus-storage systems. NREL's PV cost benchmarking work uses a bottom-up approach. First, analysts create a set of steps required for system installation.
