

# Graphite solar module price

## Overview

---

What is graphite Pricewatch?

PriceWatch is your trusted resource for tracking global graphite price trends. Our platform delivers real-time data and expert analysis, offering deep insights into the key factors driving price fluctuations in the graphite market.

How much does graphite cost in 2024?

In the fourth quarter of 2024, the global graphite market experienced a modest price increase of \$483.28 per metric ton, FOB Shanghai reflecting a 1.08% rise. This uptick was observed across various regions, including the United States, China, and Germany, where prices reached \$1,114, \$876, and \$721 per metric ton, respectively.

How much does a solar module cost in 2025?

Specifically, in August 2025, the Price Index showed: about €0.055/Wp for low-cost photovoltaic modules, unchanged from July prices. “Manufacturers are moving quickly to end the devastating price war. The Chinese government is gradually phasing out tax incentives and subsidized solar module exports.

Where can I find the latest graphite prices & market trends?

Stay up to date with the latest graphite prices and market trends, sourced directly from Asian Metal, a trusted provider of real-time price assessments and industry insights. This data offers valuable perspectives on natural and synthetic graphite pricing, market fluctuations, and key trends affecting supply and demand. Forgot Password?
