

Haiti Energy Storage Power Generation

Overview

What challenges does Haiti face in generating and distributing electricity?

Haiti faces significant challenges in generating and distributing energy reliably, and lack of access to affordable and reliable power significantly hinders investment and business development. The majority of electricity is produced using imported fossil fuels.

What is the solar power plant capacity in Haiti?

The solar generation capacity of the Solar Power Plant will be 1.2 MWp with a storage capacity of 800 kW / 330 kWh. in the Commune of Jacmel, in the South-East Department and will be connected to the regional electricity network of Jacmel. Haiti's 2020 total GHG Emissions (mtCO₂e) per the World Bank is 10,267.

What are the energy resources in Haiti?

Haiti has limited energy resources: no petroleum or gas resources, small hydroelectricity potential and rapidly declining supplies of wood fuels. With very limited access to electricity, most of the population in Haiti depends on charcoal as a source of energy.

How much energy does Haiti consume?

Haiti consumes approximately 574 million kilowatt-hours of electricity per year. In 2002, the country produced 618 million kilowatt-hours of electricity while consuming this amount. Haiti uses very little energy, with each person using about 250 kilograms of oil equivalent per head, per year. Most of the country's energy comes from burning wood.
