

How big should I buy a solar lamp for indoor lighting

Overview

How many solar lights do you need for indoor use?

These solar lights for indoor use include three solar lamps, each offering 200 lumens and five brightness settings. The control box lets you adjust brightness and charge other devices like phones or tablets. Instead of a remote, the kit features three light switches for individual control.

How bright are indoor solar lights?

These indoor solar lights are not as bright as the others on this list, with only 40 lumens of brightness. But it's still enough to provide a soft and warm light for your indoor space. The solar panel has a 13ft cord and a charge time of 8 hours, with the battery able to last up to 16 hours at night.

How much power does a solar light use?

This indoor solar-powered light has a sleek modern design (6.3" diameter) that looks appealing. It offers 3W of power that's supplied by sunlight in the daytime. The solar panel stores power for night lighting with built-in 400mAh lithium battery, lighting up in darkness and lighting off in sunrise.

How to choose the best indoor solar light?

You can get an excellent indoor solar lighting experience if you keep the following information in mind: The active time of this light: The active time of this light can range from a couple of hours to 12 hours or even more. So, always check the battery's longevity before installing it.
