

# How many 5G base stations does Oslo Communications have

## Overview

---

In March 2020, Telenor became the first Norwegian mobile operator to offer 5G connectivity to customers. The telecoms giant rolled out the network in nine different places, as the first step in a national roll.

How many 5G base stations are there in China?

In data collected between July 2022 and June 2024, China was reported to have had around 3.5 million 5G base stations installed across the country, with Chinese mobile operators investing heavily in 5G infrastructure. By comparison, the European Union had around 460,000 thousand base stations, while the United States had approximately 175,000.

Does Telia have 5G in Oslo?

To access Telia's 5G network in Oslo, you need a mobile subscription from Telia and a phone that supports the new technology. However, those in rural areas of Norway may have to wait until as late as 2023 for full national 5G coverage. In September, Ice joined the 5G party with a network launch in Tromsø.

Will 5G improve mobile coverage in Norway?

The new 5G network will provide better mobile coverage and gradually better access to broadband across the country, which will reduce the vulnerability of an increasingly digitised society," said Linda Hofstad Helleland. In March 2020, Telenor became the first Norwegian mobile operator to offer 5G connectivity to customers.

Which country has the most 5G networks in the world?

South Korea is another leader in 5G adoption. With over 200,000 active base stations, the country boasts nearly 90% population coverage. This has made South Korea one of the most connected nations in the world, with advanced use cases in entertainment, healthcare, and finance.
