

Huawei Energy Storage Product Safety Standards

Overview

How safe is Huawei's fire-free energy storage system?

With the battery-pack-level thermal runaway control, Huawei's fire-free energy storage system (ESS) redefines safety. Huawei Digital Power and TÜV Rheinland jointly completed ESS safety tests on Huawei's Smart String & Grid Forming ESS Platform (LUNA2000-4472 series and LUNA2000-215 series).

What is Huawei digital power?

With safety as its top priority, Huawei Digital Power is driving the healthy and sustainable development of the energy storage industry, and making valuable contributions to the creation of clean, low-carbon, safe, and efficient new power systems.

What is energy storage safety classification?

These efforts aim to ensure the high-quality and healthy growth of the energy storage industry. The safety classification comprises three levels: Level 1 (Basic): The ESS complies with basic laws, regulations, and standards, meeting the safety requirements for market admission.

What is TÜV Rheinland's safety classification for energy storage?

In response, TÜV Rheinland has built upon existing standards and further refined safety definitions to develop a comprehensive safety classification for energy storage tailored to specific scenarios. These efforts aim to ensure the high-quality and healthy growth of the energy storage industry. The safety classification comprises three levels:

Huawei Energy Storage Product Safety Standards
