

Huawei solar container battery type identification

Overview

How does the Huawei Luna battery pack work?

This technology allows optimization of the energy level of the battery pack. Huawei Luna consists of the Power Module, the electronic component and 5 kWh battery packs. The modular design allows to expand the storage capacity from 5 kWh up to 15 kWh with the possibility of stacking up to 3 battery packs (of 5 kWh each) for each system.

What is the storage system made by Huawei Luna 2000?

The storage system made by Huawei LUNA 2000 is available. The system can be modulated with lithium batteries from 5kWh to 15kWh. High-voltage lithium iron phosphate (LFP) batteries have a very stable and resistant chemical structure. This technology allows optimization of the energy level of the battery pack.

What is Huawei luna2000-2.0mwh-2h1?

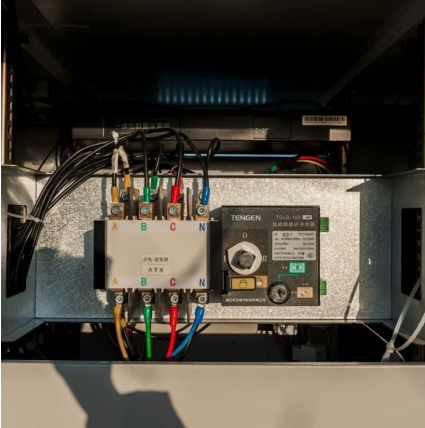

The Huawei LUNA2000-2.0MWH-2H1 is a containerised LFP battery system delivering ≈ 2.03 MWh of energy and 1.016 MW of rated power for 2-hour discharge applications. It combines smart rack controllers, modular PCS units (up to 99 % efficiency), IP55 protection, smart air cooling and comprehensive safety systems for outdoor grid-grade deployments.

How many battery modules can a luna2000 battery have?

The LUNA2000 battery has a modular design with 5kWh battery modules, up to 3 battery modules can be stacked for each system to create a 5, 10 and 15kWh system. The compact and elegant design makes the system aesthetically pleasing.
