

Integrated solar panels

Overview

How do integrated solar panels work?

Integrated solar panels are installed flush within a roof structure, replacing sections of the roofing material, while regular panels are mounted on the rooftop.

What are integrated solar panels?

All types of solar panels have become much less bulky – they're now designed with aesthetics in mind. Integrated solar panels, in particular, can give users the best of both worlds: high efficiency with a sleek, modern look. Want to learn more about these discreet panels?

We've got everything you need to know waiting in our helpful guide below.

What are the different types of integrated solar panels?

In-roof frames: These integrated solar panels replace sections of the roof tiles or slates, sitting flush with the underlying roof structure. These frames are commonly used in both home renovations and new builds. **Bespoke integrated panels:** These solar panels are specifically designed and manufactured for in-roof installation.

How much do integrated solar panels cost?

Installing integrated solar panels for an average 3-bedroom home costs somewhere between £5,000 – £6,000. With such an installation, you can expect savings of up to £660 per year on your electricity bill. If you're looking to seamlessly blend form and functionality, then installing integrated solar panels might be a great option for you.
