

Is portable car power bank safe

Overview

Can you keep a power bank in your car?

One of the main concerns consumers have about driving an electric vehicle is range anxiety, so ZipCharge decided to solve the problem with a large, portable power bank you can keep in the back of your car. We're used to power banks for smartphones and laptops, but the ZipCharge Go is on a whole different scale.

Are power banks safe?

Back to Product safety tips Power banks are generally rechargeable lithium-ion or lithium-polymer batteries that are used to provide a portable source of power for electronic devices. Although generally considered safe, they can catch fire or cause burns if they malfunction.

Should you buy a portable power bank?

If you need a higher capacity power source for a longer period of time, a portable power bank with a large mAh such as 40,000 mAh is the safest chance. With this option you do run the risk of sacrificing portability, so you must plan how you can store it for easy accessibility.

What are the safety requirements for power banks?

Specifically, power banks must: 1. Meet safety requirements of either: i. IEC 62133:2012 for battery safety AND ii. IEC 60950-1:2005 or IEC 62368-1:2018 for general safety 2. Come with essential safety information, including: A. Minimum instructions for use that are specified on page 15 of the CGSR Information Booklet B. Charging instructions
