

Is solar air conditioning useful in Spain

Overview

Can Spain save energy with air conditioning & heating?

In the name of conserving energy, and meeting climate change goals, Spain has enforced rules to save energy with air conditioning and heating.

Why should you install solar panels in Spain?

There are endless benefits to installing solar panels, from the energy they generate to the long life of the panels, but here in Spain there are even more opportunities that enhance the benefits of solar energy. Did you know that we have 2,500 hours of sunshine per year?

.

Can solar energy provide hot water and heating in Spain?

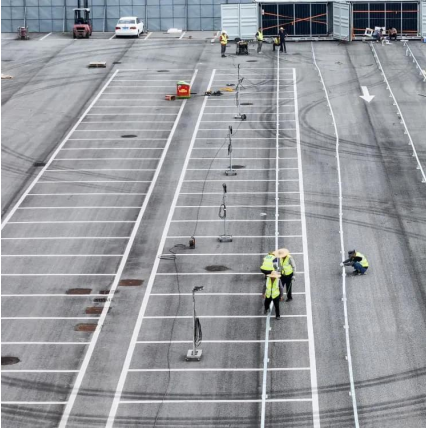

The use of solar energy to provide hot water and heating is still rare in Spain, where the amount of energy provided by the sun each year per square metre is equivalent to eleven gas bottles.

How does air conditioning affect electricity consumption in Spain?

In what concerns Spain, electricity consumption is affected by the use of air conditioning during the summer months. Even though energy demand associated to air condition does not surpass 1% of the total figure, Figure 2.9, being a seasonal service, it may cause spikes in demand that can be hard to manage.
