

Jakarta Energy Storage Power Plant

Overview

Will Indonesia build a 100 GW solar power plant?

Jakarta, August 7, 2025 - Indonesia will build a 100 Gigawatt (GW) Solar Power Plant (PLTS). The program plans to build 80 GW of solar power plants and 320 GWh of Battery Energy Storage System (BESS) to be managed by the Merah Putih Village Cooperative (KDMP) in 80,000 villages, and 20 GW of Centralized solar power plants.

Can solar power plants be used in Indonesia?

Indonesia possesses solar energy potential with a capacity ranging from 3,300 GW to 20,000 GW, spanning from Sabang to Merauke. With increasingly affordable, modular, and easy-to-build and operate solar power plant (PLTS) technology, this project could serve as a strategic solution to provide reliable and affordable energy access across Indonesia.

Will 100 GW solar power plant be installed in villages?

According to pv magazine, the “100 GW Solar Power Plant Plan for Village Cooperatives,” mandated by President Prabowo Subianto, will see 80 GW installed as 1 MW solar arrays paired with 4 MWh battery energy storage systems in 80,000 villages.

Should you invest in Jakarta energy storage product production?

Let's cut to the chase: If you're exploring Jakarta energy storage product production, you're likely either an industry insider, a sustainability-focused business, or an investor eyeing Southeast Asia's clean energy gold rush.
