

# Japan Osaka solar panel rail manufacturer

## Overview

---

Will solar panels be installed on the Tokaido Shinkansen N700S?

The Tokaido Shinkansen N700S (Provided by JR Tokai) NAGOYA--The operator of the Tokaido Shinkansen Line plans to install next-generation, thin solar cells on noise barriers along its tracks.

Where will solar panels be installed on the Shinkansen line?

Photovoltaic performances will also be tested in other outdoor environments. The Tokaido Shinkansen Line generally runs in an east-west direction between Tokyo and Shin-Osaka stations. Plans call for solar cells to be installed on guide rails attached to the outer side of the south-facing noise barrier walls.

Will a film-type perovskite solar cell be installed in Umekita (Osaka) Station?

SEKISUI CHEMICAL will install film-type perovskite solar cells in the public square of Umekita (Osaka) Station, which will be developed based on the theme of an “eco station that is environment-friendly and created together with visitors.”.

How big is Japan's solar industry?

The Japanese solar industry, with a current capacity of 75 GW, is set to reach 108 GW by 2030, driven by a 9.2% CAGR and expected to exceed USD 10 billion in revenue by 2025. Government policies, including Feed-in Tariffs, and growing investments in residential, commercial, and utility-scale projects,
