What is the Rwanda stand-alone solar market update?

Photo courtesy of Ignite Rwanda The Rwanda Stand-Alone Solar Market Update is one of a series of 14 national briefings published by the Africa Clean Energy (ACE) Technical Assistance Facility (TAF) to give stakeholders a snapshot of recent developments in the stand-alone solar sector, including those arising from the COVID-19 pandemic.

How much does a solar system cost in Rwanda?

For example, lighting expenditure on average does not exceed USD1.8 per month, but because the minimum standards require larger, high-quality systems, the lowest-priced pay-as-you-go (PAYG) SHS currently available in Rwanda costs USD3.9 per month. Affordability remains a key hindrance to the adoption of stand-alone solar (SAS) products.

Is solar energy a viable solution for rural households?

Solar energy is a promising solution to meet the demand for rural households' electricity services in remote locations. As of May 2021, 16 % of Rwandan households are accessing electricity through off-grid systems, mainly solar.
