

# Kyrgyzstan new energy vehicle solar energy storage

## Overview

---

What is Kyrgyzstan's solar project?

The project underscores Kyrgyzstan's commitment to sustainable energy development and environmental preservation. The solar plant, once operational, is expected to generate 155 million kWh of electricity annually, contributing to the country's energy needs while reducing reliance on fossil fuels.

Why is China building a 100 MW solar power plant in Kyrgyzstan?

Kemin, Kyrgyzstan — In a significant step toward enhancing Kyrgyzstan's energy infrastructure, China has begun construction of a 100 MW solar power plant in the city of Kemin, located in the Chuy Region. The project underscores Kyrgyzstan's commitment to sustainable energy development and environmental preservation.

What is Kyrgyzstan's energy saving potential?

Kyrgyzstan's energy saving potential is significant: it is estimated that rehabilitation and modernisation can save up to 25% of electricity and 15% of heat.

How has Kyrgyzstan improved energy statistics data collection?

Kyrgyzstan has achieved great progress in strengthening energy statistics data collection through the INOGATE programme: the National Statistical Committee has submitted joint annual questionnaires to the IEA since 2014, and for 2015 the breakdown of natural gas consumption by sector had improved.
