

# Large Energy Storage Power Equipment

## Overview

---

Why is Tesla building a large-scale energy storage facility in China?

Their growing use helps stabilize power grids, prevent outages, and reduce reliance on fossil fuels. This project is Tesla's first large-scale energy storage installation in China, complementing its existing automotive manufacturing presence in the city through Giga Shanghai.

How many megapacks will Shanghai megafactory supply?

The newly opened Shanghai Megafactory is expected to supply Megapacks for the new energy storage station. The factory has a targeted annual capacity of 10,000 Megapack units, equal to 40 GWh of storage. Are you buying a Tesla?

.

What is compressed air energy storage (CAES)?

The press conference was attended by nearly 200 industry leaders, experts, and media representatives, including: Compressed air energy storage (CAES) is a highly efficient large-scale energy storage technology that stores excess electricity by compressing air during off-peak hours and releases it to generate power during peak demand.

Will Tesla build a grid-scale battery energy storage station in China?

Tesla has officially signed a ¥4 billion (C\$764/US\$557 million) deal to build its first grid-scale battery energy storage station in China, leveraging its Megapack technology.
