

Luxembourg monocrystalline solar module glass

Overview

What is a glass/glass Polly/monocrystalline module?

Glass/Glass polly/monocrystalline modules with unique Glass/Glass design and thermo-sealing protection at all perimeter of the module ensuring superior robust protection against UV, humidity, ammonia and salt corrosion. Safety laminating is ensured by PVB foil.

What is a 132-cell monocrystalline n-type HJT solar module?

132-cell monocrystalline N-Type HJT solar module with bifacial 210 mm x 105 mm cells and glass-glass construction. This monocrystalline solar module, with 210 mm x 105 mm HJT cells and glass-glass construction with white mesh backing, impresses with its very high wattage.

What is 144-cell monocrystalline n-type HJT solar module?

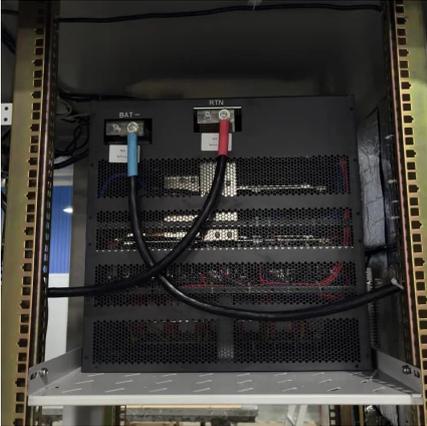

144-cell monocrystalline N-Type HJT solar module with bifacial half-cell architecture and glass-glass construction. This monocrystalline solar module, in half-cell architecture and glass-glass construction with white mesh backing, impresses with its very high wattage.

What is the difference between glass and plastic solar modules?

Glass/Glass modules withstand air and moisture and offer best cell protection, while plastic backsheets of glass/foil modules become porous. The Glass/Glass composite protects solar cells against micro cracks and thus ensures long-term operating life of 40 years and more.

Luxembourg monocrystalline solar module glass

Glass

Glass-Glass monocrystalline Solar module We provide solar PV systems from small private house installations to large scale projects. Our products and solutions provide highest quality ...
