

# Manila Energy Storage Fire Fighting Solution

## Overview

---

What is Masinloc battery energy storage?

The Masinloc Battery Energy Storage System (BESS) is the first battery energy storage facility in the Philippines and one of the first in Southeast Asia. We started our venture into battery energy storage technology in 2018 when we acquired this 10 MW system from AES Philippines.

How is Bess transforming the Philippine energy industry?

With the commercial operations of approximately 1,000 MW of BESS facilities across 32 locations in the Philippines, we are now ushering in a new era for the Philippine energy industry through significant improvements in grid reliability and the integration of more renewable power sources to the country's diverse energy mix.

Are fire incidents in battery energy storage systems a problem?

Fire incidents in battery energy storage systems (BESS) are rare but receive significant public and regulatory attention due to their dramatic impact on communities, first responders, and the environment. Although these incidents are decreasing, each case provides insights to improve energy storage safety.

How can battery energy storage safety management be improved?

To strengthen battery energy storage safety management, manufacturers now conduct large-scale fire testing (LSFT) to provide evidence when assessing the risks and support regulatory approvals. Adherence to international standards ensures that BESS projects integrate fire suppression, gas detection, and proper site management.

## Manila Energy Storage Fire Fighting Solution

### [Fire Safety Solutions for Energy Storage Systems , EB BLOG](#)

Explore advanced fire safety solutions for energy storage systems, including fire suppression techniques and innovative technologies to protect personnel and equipment.
