

# **Nanya Energy Storage bans lithium batteries**

## Overview

---

Will China restrict the export of lithium-ion batteries?

- Envision beats rivals in wind power bids In focus: China mulls export restriction on battery technologies What's new: China is considering restricting the export of some technologies used in the production of lithium-ion batteries, the core power source for electric vehicles (EVs) and critical for the global clean energy transition.

Is Tesla launching a battery factory in Shanghai?

Tesla's new battery factory in Shanghai. Photo: Xinhua In this week's Caixin energy wrap, we analyze China's biggest climate and energy news on policy, industry, projects and more: • China to restrict export of battery tech • Tesla opens Shanghai battery plant • NEVs' auto market share to top 55% • Envision beats rivals in wind power bids.

Will China ban lithium iron phosphate & Lmfp battery cathodes?

So, the news that the Chinese Ministry of Commerce has proposed an unprecedented export ban on technologies critical to producing Lithium Iron Phosphate (LFP) and Lithium Manganese Iron Phosphate (LMFP) battery cathodes has caused some disquiet.

Are LFP & Lmfp battery technologies limiting global access?

In recent years, LFP and LMFP battery technologies have become increasingly important in the global battery market. Together, they currently power nearly 50% of the world's electric vehicles. By restricting global access to technologies like these, China appears to be safeguarding its position as market leader.

## Nanya Energy Storage bans lithium batteries

### The Battery Storage Delusion: Utility-Scale Batteries Are No ...

Download Issue Brief The Issue Utility-scale lithium-ion battery energy storage systems (BESS), together with wind and solar power, are increasingly promoted as the ...
