

Netherlands Energy Storage Equipment Procurement

Overview

What is the Netherlands Advancion energy storage array?

The Netherlands Advancion Energy Storage Array was commissioned in late 2015 and provides 10 MWh of storage to Dutch transmission system operator TenneT. The project, which represents 50% of all Dutch energy storage capacity, provides frequency regulation by using power stored in its batteries to respond to grid imbalances.

What is the energy supply in the Netherlands?

Currently, the Dutch energy supply is still dominated by natural gas and coal. In 2021, natural gas made up 47% of the country's primary energy supply. It is also one of the largest gas producers in Europe, however, renewable energy production is slowly rising in the Netherlands.

Are all energy storage facilities in the Netherlands electro-chemical?

All energy storage facilities in the Netherlands are electro-chemical, with the exception of the contracted 1 MW Hydrostar underwater compressed air energy storage project in Aruba (Caribbean). Hydrostar is a Canadian company specializing in underwater compressed air energy storage technologies.

Is there a business case for energy storage in the Netherlands?

As mentioned above, there have been two major barriers, or stumbling blocks, to the business case for energy storage in the Netherlands to date. As of the beginning of 2022, one of those has been eliminated, to the great relief of GIGA Storage and others in the industry.
