

New energy storage appliances in Eastern Europe

Overview

What is the European energy storage inventory?

A new interactive platform delivers real-time clean energy storage insights as Europe shifts toward sustainable energy sources. Energy storage helps to balance supply and demand. The European Energy Storage Inventory is the first of its kind at European level to show all forms of clean energy storage solutions.

How many energy storage facilities are there in Europe?

Europe currently has 913 energy storage facilities in operation, with a combined capacity of 67 GW. The predominant technology is mechanical storage (54.6 GW) with pumped storage hydropower plants. However, electrochemical storage, including lithium - ion and flow batteries, is catching up, at 11 GW.

What is the largest energy storage project in Europe?

Particularly noteworthy is the ambitious project in Alfeld (Lower Saxony), which is considered the largest approved storage project in Europe with a performance of 137.5 megawatts and a storage capacity of 275 megawatt hours.

Which country has the most energy storage projects?

By far, the largest number of projects are located in the United Kingdom - 66 (6,2 GW). Italy is in second place (with 13 projects totaling 1.7 GW), followed by Germany (19 - 1.6 GW), according to the inventory. European Energy Storage Inventory - projects under construction by country
