

# Off grid solar power inverter in Czech-Republic

## Overview

---

What is a solar inverter?

The solar inverter or inverter converts direct current into alternating current, thanks to which the energy from the photovoltaic system can only be used. We offer classic or hybrid (mains and battery) inverters with different performance and characteristics.

How does a solar inverter work?

The inverter converts direct current into alternating current, thanks to which the energy from the photovoltaic system can only be used. It monitors the performance of solar panels, important network parameters and values, ensuring high yields and safety of the photovoltaic system.

What is a network photovoltaic inverter with data logger?

Network photovoltaic inverter with data logger. Robustní 3fázový střídač pro velké fotovoltaické systémy s výkonem 100.000 W. Verze D (decentralizovaný design) The solar inverter or inverter converts direct current into alternating current, thanks to which the energy from the photovoltaic system can only be used.

Where are photovoltaic power plants built?

Since 2007, we have built photovoltaic power plants for ourselves and our customers in the Czech Republic and abroad (United Kingdom, Romania, Turkey, Hungary, Russia, Kazakhstan and Ukraine) with a combined capacity of 428 MWp.

## Off grid solar power inverter in Czech-Republic
