

Palestine Solar Tile Design

Overview

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

Who is design Palestine?

Design Palestine designed and coordinated the ACLAÍ Gym, a thriving resource that holds classes for Aida and Azza residents. Learn more about their work here. Currently under construction, the H4P health clinic will be a home base for community health workers who work with Health for Palestine in Bethlehem.

How do solar tiles work?

Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof. Photovoltaic cells in solar tiles turn sunlight into direct current (DC) energy.

Are photovoltaic floor tiles sustainable?

Photovoltaic floor tiles combine solar energy generation with durable paving materials, offering sustainable energy solutions for urban spaces, public areas, and smart cities, while reducing carbon emissions and saving space.
