

# Poland 5G base station battery

## Overview

---

How much money does Poland spend on battery energy storage?

Poland has finalized a comprehensive subsidy program aimed at accelerating the deployment of battery energy storage systems (BESS), with a total budget of PLN 4 billion (approximately €1 billion).

Why is Poland launching a grid-scale battery system?

The introduction of this storage support program marks a key milestone in Poland's energy transformation. By enabling the deployment of grid-scale battery systems, the country is strengthening its ability to integrate larger volumes of clean energy, reduce dependence on fossil fuels, and enhance power system stability.

Are mobile operators building 5G networks in Poland?

Mobile operators in Poland have been testing 5G technology and have begun preparations for building 5G networks. While early pilot projects were mostly based on Huawei technology, in later initiatives the operators have focused on Ericsson and Nokia.

Is 5G available in Poland?

Yes, there is 5G in Poland. All the 4 mobile internet providers offer 5G. However, the 5G coverage differs per operator, see the coverage maps below. Poland is working hard to bring 5G all over the country. Check the Poland 4G/5G coverage maps for more details.

## Poland 5G base station battery

### Poland Launches EUR1 Billion Battery Storage Program to Boost Grid

Learn about Poland's EUR1 billion energy storage subsidy aimed at installing 5.4 GWh of BESS by 2028, strengthening grid stability and accelerating the green transition.
