

Prague Solar Electric System Installation

Overview

How does a rooftop PV system work in the Czech Republic?

In the Czech Republic, a rooftop PV system is usually developed and operated by a third-party developer or directly by the building owner or its affiliates. It is also possible for the building owner to develop the PV system and lease it to a third party, but this is not very common in the Czech market.

Where are photovoltaic power plants built?

Since 2007, we have built photovoltaic power plants for ourselves and our customers in the Czech Republic and abroad (United Kingdom, Romania, Turkey, Hungary, Russia, Kazakhstan and Ukraine) with a combined capacity of 428 MWp.

What is solar power production from photovoltaic power plants (PVPP)?

Solar power production from photovoltaic power plants (PVPP) has great prospects. The constantly decreasing costs of photovoltaic technology makes solar power fully competitive with electricity supplied from the grid. Solar power is one of the inexhaustible energy sources.
