

# Price quote for a 100kW solar-powered containerized base station in Australia

## Overview

---

How much does a 100kW Solar System cost?

As per the table, the average cost of a 100kW solar power system as of August 2024 is \$87,920 including GST and the STC upfront rebate. The graph below - from our Commercial Solar PV Price Index - shows average price trends for 100kW solar systems since Solar Choice started keeping track in May 2014.

What is a 100kW Solar System?

100kW solar systems are among the most popular commercial solar system sizes in Australia, as this size is the cutoff point for up-front incentives through the federal government. This article provides an overview of most of the key points that businesses need to know if they are considering a 100kW solar system for their commercial premises.

How much does a 100kW Solar System cost in Australia?

A high-quality 100kW solar system in Australia typically starts from around A\$39,999, making it a cost-effective choice for medium to large businesses, schools, warehouses, shopping centres, or community facilities. Installation usually costs between A\$1,000 and A\$3,000, depending on your roof type, system complexity, and location.

How many solar panels do you need for a 100kW Solar System?

We use 580w solar panel in the 100kw solar system. The solar panel size is 2.5m<sup>2</sup> for one pcs. So we will need at least 500m<sup>2</sup> to put the 200kw solar system. No matter on grid or off grid solar system. You have 580W solar panels. For a 100kW solar system, you need to calculate how many panels are required. This gives approximately 168 panels.
