

# Procurement Contract for High-Voltage Photovoltaic Storage Containers

## Overview

---

What should be included in a contract for an energy storage system?

Several points to include when building the contract of an Energy Storage System:

- Description of components with critical technical parameters: power output of the PCS, capacity of the battery etc.
- Quality standards: list the standards followed by the PCS, by the Battery pack, the battery cell directly in the contract.

Should you agree on an energy storage system contract?

Agreeing on a contract can be time-consuming and nerve breaking. This report is not a reference legal paper but can give a few tips to look at when contractualization of an Energy Storage System contract.

When does an energy storage project start?

“The operations and maintenance phase of an energy storage project begins when the system has been successfully commissioned and the owner has obtained approval to operate the system.

Can a battery prototype be transported in UN 50h or 4H2 compliant boxes?

Usually those battery prototypes can be transported in UN 50H or UN 4H2 compliant boxes. Sinovoltaics' advice: the UN standard to follow for prototypes transportation depends on the size and weight of your battery pack. We suggest checking
