

# Senegal solar Power Generation System

## Overview

---

Is a solar energy project in Senegal the biggest in West Africa?

Work on a solar energy and battery storage project in Senegal, touted to be the biggest in West Africa once it goes live, is set to begin next month after an EPC (Engineering, Procurement and Construction) contract for its development was recently signed. The Kolda project will encompass a 60MWp PV solar plant coupled with a 90MWh storage system.

Does Senegal have solar power?

Fortunately, Senegal has a high potential for solar energy, enjoying around 3,000 hours of sunlight annually. In 2023, solar power made up 47.4 percent of the country's renewable energy portfolio, followed by hydro and wind power.

Is Senegal ready for a solar energy transition?

This transition is expected to be fueled by the Just Energy Transition Partnership (JETP) as well as private sector investment. Fortunately, Senegal has a high potential for solar energy, enjoying around 3,000 hours of sunlight annually.

Can renewables improve energy access in Senegal?

How Renewables Can Advance Energy Access and Ec. In recent years, energy has been at the front of Senegal's national agenda. The country has made significant progress on electricity access, which rose from 39 percent in 2001 to 74 percent in 2023, one of the fastest increases in Africa.
