

Solar Containerized Long-Term Installment Payment

Overview

Should I pay for my solar investment in cash?

Given the relatively high interest rates, solar.com recommends homeowners pay for their solar investment in cash if they can. This will achieve the lowest value of solar power possible and is a safe place to invest money in an otherwise highly volatile market. But, for homeowners who are looking to finance their solar, what are the best options?

.

What solar financing options are available in 2025?

Read more about the different solar financing options available. In 2025, solar.com Energy Advisors typically recommend using a solar loan to finance a solar system — if the homeowner can efficiently monetize the 30% federal tax credit. If they can't, then a solar lease or PPA is the best option.

Should you get a solar loan or a PPA in 2025?

In 2025, solar.com Energy Advisors typically recommend using a solar loan to finance a solar system — if the homeowner can efficiently monetize the 30% federal tax credit. If they can't, then a solar lease or PPA is the best option. Want to see your solar savings potential?

.

Should you buy a solar lease or PPA?

If they can't, then a solar lease or PPA is the best option. Want to see your solar savings potential?

Although there are many different types of solar loans available, the key question homeowners should ask themselves is whether they want to “buy down” their rate or not.
