

# Solar Inverter Island Company

## Overview

---

Who is island solar power?

ISLAND SOLAR POWER Swimsol provides affordable and durable marine floating & rooftop solar PV systems for the tropics, where land space is limited. We make solar energy a hassle-free experience by handling all the tech & maintenance. We work with ultra-luxury resorts and small businesses alike - always aiming to provide great service.

What is a sunny island inverter?

The Sunny Island inverters are bi-directional battery-based inverter/chargers that can be used completely off-grid, or for battery backup in grid-tie systems either with charge controllers or with grid-tie inverters using AC coupling. The Sunny Island includes sine-wave output power at 120 VAC only.

What makes Sunny Island X a good inverter?

It delivers full power, even at extreme ambient temperatures up to 45 C. Made to the highest quality standards in Germany, the Sunny Island X guarantees reliability and durability. In on-grid systems, the inverter improves energy management and ensures efficient use.

What is solar PV on a resort island?

Solar PV on a resort island a clear sustainability message to your clients and partners The colour of PV panels matches the island colour palette Swimsol provides a unique solution to achieve desired solar production capacity - floating solar powerplant at sea (offshore solar). SolarSea produces 5-10% more energy due to natural cooling at sea.

## Solar Inverter Island Company
