

# **Solar PV module production in Pakistan**

## Overview

---

What are the major developments in the production of solar energy in Pakistan?

Another major development in terms of the production of solar energy in Pakistan is that the government has decided to install solar panels that will float on the waters of some of the major canals and dams in Pakistan to bring up the level of the overall contribution of alternative energy resources to country's energy mix.

When did solar PV enter Pakistan's energy mix?

Solar PV power entered Pakistan's energy mix in 2013 after the government introduced a set of support policies to foster renewable energy development. The Pakistani government knows that Pakistan has an average of 9.5 hours of sunlight daily.

What is solar energy & how does it work in Pakistan?

Solar energy converts energy from sunlight into electricity directly using photovoltaics (PV) or indirectly using concentrated solar power. Due to the falling cost of solar modules and the number of upcoming projects, the utility sector will likely be the most significant part of the Pakistani solar energy market over the next few years.

Which company has the largest solar PV module manufacturing capacity in India?

The company has the largest solar PV module manufacturing capacity in India, with 1.5 GW at their plants in Surat and Umbergaon in Gujarat. As of right now, Waaree Energies is one of the top players in India when it comes to providing EPC services, project development, rooftop solutions, and solar water pumps.
